OBJECTIVE

I am a passionate and dedicated junior web developer with hands-on experience in the MERN stack, specializing in React.js to build innovative and engaging websites. Over the past year, I have honed my skills in front-end development, consistently delivering high-quality projects by adhering to documentation and Figma designs. My goal is to advance as a software engineer over the next five years, contributing to impactful projects and excelling in a leading tech company. As a CSE graduate, I am committed to continuous learning and delivering exceptional results

PROJECTS

Survey Pro

A survey pro website with user, surveyor, and admin dashboards, focusing on survey participation, management, and analytics.

Features:

1. **User Dashboard**: Participate in surveys, view submitted survey reports.
2. **Surveyor Dashboard**: Add surveyors, manage survey details, update surveys.
3. **Admin Dashboard**: User management, assign roles, track payment history

Live Website Link: Survey Pro   Github Link: Survey Pro

TechJobFair

A TechJobFair website where users explore, apply for, and manage job applications efficiently.

Features:

1. **Job Search**: Filter jobs by categories like remote, hybrid, on-site, and part-time.
2. **Job Details and Application**: View detailed job descriptions and apply directly.
3. **Application Management**: Track jobs you've applied for and add new job postings.
